

Hidden Lake High School Campus Master Plan, Westminster, CO

Master Plan

View of Hidden Lake High School and Green Houses from location of Future Parking Lot

The City of Westminster asked Lime Green Design to study the best location and configuration of a future park that would meet the needs of the neighborhood and for a future parking lot that would meet the demands of Hidden Lake High School.

The master plan proposed to take advantage of an existing shade structure that serves as the core of the park. A pedestrian promenade links the neighborhood to the park, and the park to the school. In addition, the edges of the promenade are designed to be an arboretum for the horticulture program. The park includes a central lawn, meandering walks and a water feature, inspired by irrigation ditches running through the area.
