Building on restoration work that is underway on the Eagle River flowing through the town of Minturn, GOCO funding was sought to help improve river bank amenities including a river walk and neighborhood park.

Through several council meetings, a program and budget were developed so that the Town could make a grant application for the new park.

The park program includes an amphitheater and picnic/performance pavilion, volleyball courts, play grounds, picnic areas, and a beach. Access had to be provided for maintenance, performance set-up and handicap parking as well as parking for larger gatherings.
